FOR IMMEDIATE RELEASE

Forward Compute and Point64 Launch Joint Programme for AI Data Centre & GPU Cloud Insurance and Institutional Risk Transfer

Joint development and commercialisation agreement pairs Forward Compute's technical structuring and quantitative modelling with Point64's Bermuda-regulated (re)insurance intermediation, project finance experience and global capital-markets reach.

SAN FRANCISCO, HAMILTON and LONDON - 17 JUNE 2026: Point64 Solutions Limited, a Bermuda Monetary Authority–licensed (re)insurance intermediary with a focus on credit and adjacent financial risks, and Forward Compute, Inc., in its capacity as a quantitative structuring and risk-analytics platform for data centre, GPU cloud and AI infrastructure, today announced a binding partnership to develop and commercialise insurance and risk-transfer products for the AI data centre and GPU cloud industry.

Under the partnership, Forward Compute will lead the technical structuring, quantitative modelling and risk-pricing methodology behind the products – including catastrophe modelling, parametric trigger design and the underlying data infrastructure – while Point64 will lead institutional distribution, project finance and underwriting structures, (re)insurance capacity raising and product placement. The product set under joint development includes GPU residual value insurance and parametric outage insurance, together with contractual liability insurance and credit insurance and surety. Liquidity facilities are contemplated as a complementary feature alongside the business interruption line, where structures and regulations permit. The product set is designed for data centre operators, infrastructure financiers, end customers and developers. The parties expect to engage clients immediately, with first product placements to follow as capacity arrangements are bound.

"Data centres and the AI infrastructure built on top of them are now systemic to the global economy, but the risk-transfer toolkit lining up behind them has not kept pace with how this market is being financed. Forward Compute has built the modelling, structuring and pricing capability needed to bring these exposures to institutional (re)insurance capital, and we're excited to put our project finance expertise, placement reach and capacity relationships behind that work. This initiative is also complementary to principal investments we have made in adjacent areas such as critical minerals for energy storage, as well as sophisticated space-tech that will one day support orbital data centres" said Justin Willmott, Founder and Executive Director of Point64.

"Building credible risk-transfer for data centre and AI infrastructure exposures takes more than analytics, it takes institutional capacity that understands the asset class. Point64 brings exactly that. Working together means our structuring and modelling work meets the right reinsurance capacity from day one," said Quentin Saleur, Founder and CEO of Forward Compute.

ABOUT POINT64

Point64 Solutions Limited is a Bermuda-incorporated, Bermuda Monetary Authority–licensed (re)insurance intermediary, majority owned and controlled by Point64 Advisors Limited. The firm focuses on institutional capacity-building, (re)insurance capital markets, and the placement of structured risk transactions for institutional clients and counterparties.

ABOUT FORWARD COMPUTE

Forward Compute, Inc. designs, structures and places insurance, reinsurance and risk-transfer products for the AI compute infrastructure market. Its product set in development includes parametric outage insurance, GPU residual value guarantees, credit insurance for AI infrastructure financing and compute-energy spread instruments. The company is headquartered in Delaware. Capacity arrangements are being structured with London-market participants, including Lloyd's syndicates and specialty reinsurers, subject to binding terms. FORWARD-LOOKING STATEMENTS

This release contains forward-looking statements regarding product development, capacity arrangements, placement timing and the parties' commercial relationship. Such statements involve risks and uncertainties, including the availability of insurance and reinsurance capacity, regulatory authorisations, and the negotiation of a formal long-form agreement. Actual results may differ materially. Neither party undertakes any obligation to update such statements.

REGULATORY DISCLOSURE

Insurance, reinsurance and risk-transfer products described herein are or will be distributed through appropriately authorised channels in each jurisdiction. Point64 Solutions Limited is licensed and regulated by the Bermuda Monetary Authority. In the United Kingdom, regulated activities are or will be carried out by, or under the supervision of, an FCA-authorised firm. In the United States, products are or will be placed through licensed surplus-lines and admitted-market channels as applicable. Specific authorisations and product availability vary by product and jurisdiction. This release does not constitute an offer, solicitation or financial promotion of any insurance product.
